Trusted To Deliver What Matters Most!

Why XComms?

In a very cluttered workplace XComms provides the tools needed to break through the everyday noise created by overused and ineffective communications to guarantee that employees are always informed and engaged.

From user experience to support and pricing, we are consistently settings standards in our industry by going above and beyond not only what our competitor's capabilities are but beyond the customer's expectations.

Everything we do starts with the customer experience. We adapt our software to the customer. When it comes to the user experience with XComms our motto is to Answer the Question Before its Asked. Ease of use is everything to us!

From pricing that makes sense to service from actual locations you can trust and most importantly exceedingly advanced, up to date and easiest to deploy and user-friendly technology, XComms is the number one choice for cut-through business communication tools.

Trusted To Deliver What Matters Most!

Solutions By Industry

Whether it is a hospital, call center, school or a government facility, every organization has one thing in common: a need for better communication.

XComms helps overcome challenges specific to your organization whether that is information overload, improving awareness or just getting employee attention when it matters most.

IT DEPARTMENT
Keep employees informed of IT system outages, maintenance, service disruptions and security awareness

HEALTHCARE
Reach ALL Medical Employees Directly With Full Targeting, Scheduling and Real Time Acknowledgement Reporting.

GOVERNMENT
Reach any audience and instantly communicate emergency alerts, health and safety updates, policy changes and more.

EDUCATION
Instantly notify everyone of crucial campus communications on any device and across any network in seconds.

INFORMATION SECURITY
Improve your security position by effectively and consistently communicating internal best practices and compliance policies.

ACTIVE SHOOTER
Create instant awareness of an active shooter situation for any organization. Display alerts on any screen or device.

INTERNAL MARKETING
Promote vision, mission and culture using pop-up alerts, scrolling headlines, screen savers, wallpaper and locked screen backgrounds.

CALL CENTERS
Notify Call Center Agents of Updates without interrupting workflow and improve production standards and compliance.

Regardless of industry, XComms is a great solution to information overload.
With high impact cut-through tools, XComms guarantees that employees will know, what they need to know, when they need to know it.
100% Awareness Guaranteed.

Get Started With XComms In Minutes

Improving internal communications could not be any easier.

From your first conversation with XComms all the way to your very first sent alert, XComms will work with you each step of the way to make sure that your new communication tools are exactly what you need to guarantee awareness within your organization.

With personal and professional understanding of how crucial effective internal communication is to organizations of any size, we at XComms hold ourselves to extremely high standards so every customer knows that not only are they trusting that their internal communication solutions are recommended by the best but also that their end solution is best in class and the most affordable.

Client application is a small installer that can be easily pushed with any app deployment tools such as SCCM

XCommsSetup

To Receive XComms on Mobile Devices (optional channels)
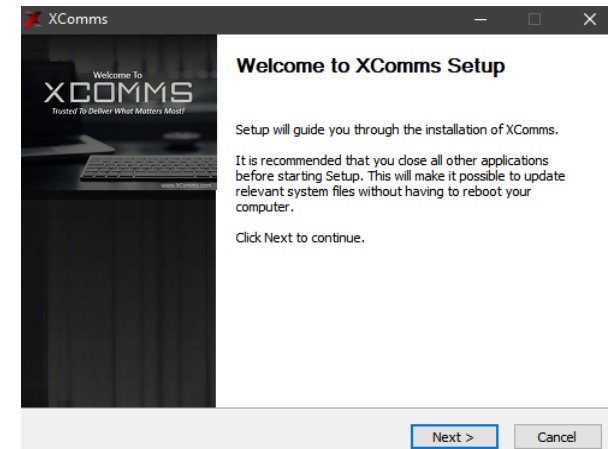

SMS | Whatsapp | E-mail

- SMS
- WhatsApp
- Email

## XComms Content Managers Web Access

- Google Chrome
- Microsoft Edge
- Internet Explorer ie11

Designed and Supported in the USA

The XComms SAAS Platform is made up of two elements: XComms Cloud Server (Azure Hosted) and the XComms Desktop Client Application.

XComms Cloud Server:

The XComms Cloud Server provides the web-based user interface for the Content Manager and core logic for the connection with and communication to the XComms Desktop Client Application via HTTPS/TLS connection.

XComms Desktop Client Application:

The XComms Desktop Client Application is a small software application that is required to be installed and running on the end user's desktop to received content distributed by the XComms Content Manager. When content is delivered to an intended target the XComms Desktop Client Application connects to the XComms Cloud Server over HTTPS/TLS.

*Locally Hosted Solution Also Available

Trusted To Deliver What Matters Most!

We Get It

We know how important effective internal communication is at work—and we're here to help you make sure it works for you.

XComms keeps your employees informed about what matters most, so you can make sure everyone is on the same page and everyone always knows what's expected.

We give you the power to communicate directly with your employees on any screen bypassing overused existing tools like email or collaboration tools; this means instant awareness regardless of device, network or location!

XComms has been used by businesses big and small for over 10 years and we keep on innovating to make sure our customers always have access to the latest and greatest in communications!

Schedule a demo with XComms and see the platform in action!

Internal communication can be complicated and ineffective communication tools can be costly in more ways than one. It is so easy for your employees to miss messages, and it can feel impossible to guarantee that they'll see what you want them to see when they need to see them. **But there is a solution: Xcomms**
